

Are Your Clients Leaving Annuity Policies to Heirs?

If yes, help your clients identify options that could maximize their outcome!

Annuities are often purchased as a safe way to accumulate money for retirement income. An annuity can be an excellent and attractive vehicle for accumulation of wealth because it has a wide range of options as well as the benefit of income tax deferral over time. An annuity has tax-deferred growth and can provide an income stream during a client's retirement. However, many people end up not needing income from their annuity for their retirement years, and their purpose in retaining the asset may shift from retirement income to estate growth. This could lead to an unexpected and disadvantageous result because annuities may not be the best way for clients to pass assets to their heirs and beneficiaries.

Why should you be conducting annuity evaluations?

- Identify options to maximize the amount of future money that passes to the clients' heirs.
- Provide added value to your relationship before another professional raises the concern.
- Identify ways to reduce taxes on the annuity due at death; use of an Irrevocable Life Insurance Trust (ILIT) when estate taxes are a concern.
- Deferred annuities are excellent vehicles for retirement planning, but are not efficient vehicles for wealth transfer.

What outcomes can you expect from annuity review?

- The client decides to keep the annuity, allowing policy values to grow and paying taxes at death. (See next page - Outcome A)
- Leverage the annuity to provide potentially higher future values for heirs, either tax-free or after-tax. (See next page - Outcome B)
- Leverage the annuity into multiple solutions for potentially higher future values for heirs and/or long term care benefit (LTC) for the client's future need. (See next page - Outcome C)

Annuity Policy Review Example

A 70 year old female client in good health living in California^ has an old \$500K non-qualified fixed annuity (with \$400K of cost basis and assuming a 40% tax bracket). She has built up sufficient assets to meet her desired income for the rest of her life. The annuity now has no income purpose and she plans to let it grow for the rest of her life and leave it to her family at her death. Let's look at some outcomes from an annuity review:

Because insurance policies may contain varying terms, conditions, and benefits, this analysis is meant to showcase possible solutions. Full illustrations would accompany our review of your client's annuity.

^ Case studies are offered to show how Tellus can provide valuable assistance to producers in placing cases. Results may vary. This is an example and does not guarantee a similar result.

* For illustrative purposes only; not a forecast of future results.

** Systematic withdrawals from existing annuity may be an option.

*** Accumulation value less LTC benefits end of second year on claim = \$0 Pricing used valid as of 2/1/2019

For Financial Professional Use Only. Not intended for use in solicitation of sales to the public. Not intended to recommend the use of any product or strategy for any particular client or class of clients. Life insurance death benefit proceeds are generally excluded from the beneficiary's gross income for income tax purposes though a few exceptions do exist. No legal, tax, or accounting advice is being given by Tellus or its representatives. Clients should consult their tax attorney. For use with non registered products only. This is not a program designed to encourage consumers to replace existing annuity policies. Products and programs offered through Tellus are not approved for use in all states. Policy riders are available at an additional cost and may not be available for all products. Terms and conditions apply. 0121 SOLC21-8712-A 0622 © 2021 Tellus Brokerage Connections
